

Flat - designed by Martin Ballendat

As the name suggests, Flat from the Tonon collection is made from a flat, flexible material which is moulded around an aluminum frame to obtain a unique shape.

The elements of the chair are held in place with special steel fixings, simultaneously providing stability, and a unique design feature.

The slightly flexible seat gives an appearance of lightness while also offering the highest level of comfort. Flat is available in over 300 finishes with a choice of three bases.

Dimensions: 32.3in(h) x 24.4in(w) x 22in(d)

Release date: March 2018
