### FOR IMMEDIATE RELEASE

#### Elements Air and Grace Air: The Forefront of Function

WADENA, MN—June 1, 2018—Homecrest Outdoor Living will display their rainstorm-ready patio furniture collections, Elements Air and Grace Air, in booth 1518 at NeoCon, June 11-13.

The Air collections use an empty box design, where water runs through the seats instead of rolling off them. This takes dry-off time after rain from being measured in minutes to seconds. Both collections also use Homecrest's popular double-layer bag sling.

Homecrest designer, Stacy Brichacek, says, "By combining the technology and design behind Homecrest's exclusive double-layer sling... [we've] found a unique niche in the market." For the Air sets, that niche is one of high function and performance. Homecrest Outdoor Living has made patio furniture for over 65 years.

Elements Air and Grace Air are both evolutions of Homecrest's popular Airo2 series. Homecrest Outdoor Furniture's booth will be on the 15<sup>th</sup> floor.
