

Safco® – Mayline® to Feature the Atmosphere™ Furniture Collection at NeoCon

Minneapolis (May, 2018): Safco® – Mayline® is thrilled to feature the new Atmosphere™ Collection.

Atmosphere is a unique collection of soft seating that adds a social element to your workspace using stylish designs and configurable options that help foster teamwork and engagement. This customizable collection is ideal for today's "work anywhere" environment, featuring modular lounge pieces that provide a comfortable space for people to meet and work.

In addition to making collaboration a breeze with modular pieces, Atmosphere also features the Ridge™ Booth that allows for private meetings or individual work. For optimal performance, the modern office should provide places for people to work with others or alone, and using pieces from the Atmosphere Collection for both spaces helps to ensure a cohesive, professional look.

The collection is completed with four lounge chairs options that can be used alongside the lounge pieces or in personal workspaces. End tables and C-tables can be easily pulled up alongside the seating spaces to provide room to work. There are also complementary accessories such as a foot stool and ottomans for added comfort, style and efficiency.

The cohesive aesthetic of the Atmosphere Collection delivers a professional yet inviting environment, and as the product name suggests, it offers the right amount of options to meet a variety of needs within the environment...within your Atmosphere.

About Safco – Mayline

With 125 years of industry knowledge, Safco® – Mayline® offers an array of furniture solutions to create top-notch spaces everyone will be talking about.
