## CLOUD - BASED CONTRACT FURNITURE PRODUCT SPECIFICATION SERVICES

**Toronto, ON April 05, 2018 – BiSemA Corporation announces today it's attendance at NeoCon 2018 in Chicago. BiSemA will be presenting a new, cloud-based, contract furniture specification services at convention booth #7-2136 NeoCon 2018, June 11 to 13, The Mart, Chicago.**

**BiSemA Corporation is a cloud-based contract furniture products specification service that hosts catalogues for office furniture and kitchen manufacturing companies. BiSemA will start providing end to end online contract furniture specification services for architects, interior designers, residential and commercial specifiers and contract furniture dealers.**

**"Currently the websites of office furniture manufacturing companies present their product with detailed information, using photos, including an installation guide, different product configuration layouts, price guide, product environmental reports, finish images, video and much more. But the information, and the images, are not on the page where products are specified by their dealers, when they are most needed." said Semegne Tafesse founder and CEO of BiSemA Corporation.**

**BiSemA brings together product information and detailed specifications conveniently onto one web page, making available all the information customers need in order to make the right decision when selecting product and finish types. This type of cloud solution has a short learning curve and users can be confident that they are picking the right product and the right finishes.**

**BiSemA allows the transfer of selected product drawing symbols from the cloud shopping cart to a local CAD application, inserting the product symbol for a space layout. This computer programming of transferring the product symbols to a local CAD application – AutoCAD, Revit, SketchUp and pCon CAD – is patent pending with the USPTO United States Patent and Trademark Office.**

**"Bringing all catalogue information together for a selected product, dynamically, and specifying it with users' local CAD applications for space layout is one of the main benefits of using BiSemA's specification services." continued Tafesse.**

---

---

Products that are in the shopping cart or on local CAD application can be sent to tablets and smartphone whether they are Android or iOS. This collaborative service will help registered users and sales team to communicate easily and update their projects.

BiSemA Corporation will present all of its new cloud specification and collaborative services to manufacturing companies and dealers at NeoCon – 2018 booth #7-2136 Chicago.

###
