Creation Baumann for Carnegie Introduces Net Works Collection for Windows

New York, NY – Inspired by knitting techniques that create high-performance active wear, Creation Baumann for Carnegie introduces the Net Works collection for windows.

Utilizing the latest in modern knitting technology, these three new designs translate the look of sportswear to window textiles that drape beautifully and deliver a sense of movement. These 118" wide designs are all constructed of high quality Trevira CS and meet the most stringent flame codes worldwide.

Space is a square net fabric with a twist. Offered in 10 activewear inspired colorways; two alternating yarn colors create an iridescent effect that changes with lighting and movement.

Link is more open spaced knit that has a subtly sophisticated shimmer. A delicate fine black yarn is knitted within the larger knit to create a strong three dimensional effect in 7 softer tonalities.

Globe is a larger scale open knit which uses a smooth matte yarn to create a strong mid century design ambiance. The overall effect of the 6 colorways is both sporty and modern.

About Carnegie

Carnegie is a leading manufacturer and innovator of textiles in North America. Since 1950, the family-owned company has established a tradition of firsts, including the development of its own Xorel® fabrics, which provide a durable alternative to PVC materials and Biobased Xorel, the first plant based high performance textile in the world. In addition, Carnegie has built a reputation for its ongoing and comprehensive commitment to the environment through all parts of its business cycle by being a member of the Be Original organization, maintaining a B Corp certification, and by establishing themselves as the first and only interior textiles PVC free company in the industry.
