# Light Tape®

Electro-LuminX®

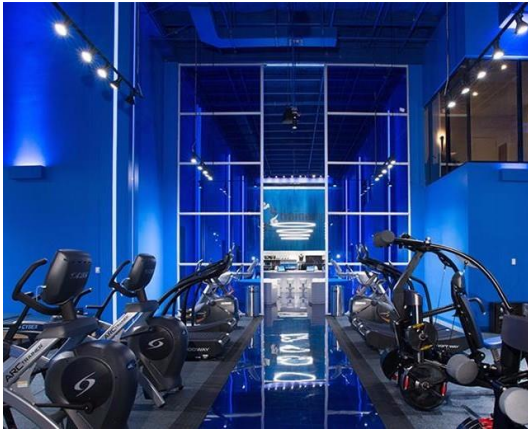

## Light Tape® Interior Accent Lighting

When designing the new TrainerSpace fitness center in Boca Raton, Florida, designer Cuoco Black knew it had to be the perfect balance of style and performance. The facility is designed with 3" Electric Blue Light Tape® throughout to inspire the members with a modern, energetic

atmosphere, while minimizing distractions from training programs. Because the last thing anyone wants is an annoying light shining in your eyes while lifting weights.

---

## Inspiring Designs

Multiple widths and colors to choose from, Light Tape® is extremely easy to turn any wall or surface into illuminated inspiring art.

---

## Sleek and clean

Unlike LEDs, you don't need a bulky light box to diffuse diodes. Light Tape® provides even, clean illumination every time without the mental exercise of creating a diffusing fixture.

## Easy Installation

Light Tape can be delivered with an adhesive backing. All you have to do is peel, stick, and connect to your plug-n-play Smart Driver™ power supply... then pump it up!
