

ERGOCHIEF™ exhibits Infinity™
for the first time at NeoCon
www.ergochief-usa.com/infinity

Infinity Height Adjustable System

Infinity was designed with the modern spaces in mind. The geometric walls are designed to create infinite configurations adapting instantly to a multitude of use-case and workspaces. The stackable design allows this infinite configuration to grow with the size of the teams.

The hidden height adjustable mechanism is completely noiseless and electricity free. The instantly ergonomic and wellness-oriented desk further solves modern office acoustic problems thanks to its PET acoustic walls. The PET walls are made out of 100% recycled PET bottles and can be recycled infinite times. The geometric shapes of the walls also allow perfect disassemble flat formation saving valuable storing spaces and packaging materials. There is simply no limit the ways infinity can be used in a workspace.

Specifications

Table Top: 1600mm x 800mm
(63"x 31.5")

Height Adjustment: 850mm - 1300mm
(33.4"-51.2")
