Dauphin North America introduces Fiore, a colorful chair with flair and functionality!

May 2017, Boonton, NJ—Dauphin, a leading provider of European designed, German engineered seating solutions for corporate and institutional markets will launch Fiore at NeoCon 2017.

Looking to develop a smart solution to meet today's need for flexible meeting spaces, a Dauphin Design Team led by Jessica Engelhardt created a functional and visually attractive chair program that suits many applications. The result, called Fiore, or Italian for "flower", delivers beautifully on the goal.

The center for Fiore is its simple, elegant seat produced in eight vibrant poly colors including Green, Yellow, Blue, Red, Silver, Iron Grey, Black and White. The poly shell provides a gently flexible back support while the wood shell offers a touch of the outdoors with its choice of natural oak, walnut or beech veneer.

Fiore comes un-upholstered, with an upholstered seat pad or fully upholstered. Frame options include a stackable 4-post side chair, a stackable 4-post bar stool, wood legs in oak, walnut or beech and a 4-star swivel base with casters that offers an optional tablet arm that rotates. A beautiful die-cast aluminum arm option inset with luxurious Soft Touch pads completes the offering.

The 4-post metal frame stacks 8 high on the floor (3 high for stools). A stacking dolly is also available.

The Fiore 4-leg swivel chair with wooden shell and arms has been awarded the prestigious Red Dot Award: Product Design 2017.

Fiore is a true multipurpose chair that will enhance the design of a variety of spaces. To learn more, please visit www.dauphin.com.
