Humanscale's M/Power Offers Secure, Accessible Charging and Ergonomic Design

New Monitor Arm Dock and Charging Station Combines Power and Ergonomics for Efficiency and Comfort

(June 12, 2017 – Chicago, IL) A pioneer in workplace design, Humanscale continues to deliver new ergonomic solutions for today's intelligent, connected workplace. M/Power will launch at this year's NeoCon as the newest addition to Humanscale's Connectivity series, a range of technology-integrated tools to address the changing needs of computer users.

This new category of solutions targets key trends emerging in contract design: the shrinking office, the connected office, health and wellness at work, and the rise of hot-desking. Today, the use of multiple devices, for professional and personal purposes, is increasingly common. Understanding these evolving workstation needs, Humanscale created its first connectivity solution in 2016. The first universal docking station of its kind, M/Connect combines power and ergonomics to enhance efficiency and comfort. By integrating a monitor arm base with a USB 3.0, dual-video docking station, M/Connect supports users and all their device needs. Its USB ports reside on the desktop while the charging dock resides below for function and an overall clean aesthetic.

Similar in function to M/Connect, M/Power is a USB Type-A and Type-C charging station with audio pass-through that enhances the computing experience for users by providing a universal device accommodation and easy access to high-speed charging -- all while eliminating desktop cable clutter. Designed for high security work environments that use PCs, M/Power charges personal devices without enabling the transfer of data, thereby protecting both user privacy and classified company information.

M/Power is compatible with any Humanscale monitor arm and provides an easily accessible audio headphone/microphone jack. M/Power allows easy access to ports and conceals IT connections while simultaneously providing desktop organization in offices that do not allow personal devices to be connected to enterprise technology. Like all Humanscale products, M/Power is designed with a focus on function and ergonomics. The result is a unique, all-in-one monitor arm base and charging station designed to support workers in an active, adaptive workspace.

About Humanscale

Humanscale is the leading designer and manufacturer of high-performance ergonomic products that improve the health and comfort of work life. Through leveraging new

technology in functional yet minimal designs, Humanscale transforms traditional offices into active, intelligent workspaces. Committed to making a net positive impact on the earth as well as our customers, Humanscale offers award-winning products designed with a focus on function, simplicity and longevity.
