Khameleon Software Announces New Professional Edition Cloud Solution for Small to Medium Sized Office Furniture Dealers

TAMPA, FLORIDA — October 24, 2017 — Khameleon Software is now offering a new Professional Edition Cloud Solution for small to medium sized office furniture dealers. The Professional Edition includes a suite of modules that provide your dealership with the capability to optimize your performance with a preconfigured solution designed specifically for furniture dealer operations. The out of the box solution includes: Khameleon's CRM, Financials, Distribution, Project Accounting, and Business Analytics modules. Khameleon's Professional Edition Cloud Solution pricing starts at \$65.00 per user per month.

“Many small and midsized dealerships feel stuck with an antiquated operating system because the cost and demands of implementing a traditional enterprise system on their organization are deemed too great,” says Matthew Angelone, Partner at Khameleon. Khameleon's release of a new licensing and deployment model will be delivered through Khameleon's Cloud and specifically addresses these impediments. Khameleon's Professional Edition is an opportunity for small to mid-sized dealerships to gain the efficiencies of moving to a modern operating system, designed to scale with your business.

About Khameleon

Headquartered in Tampa, Florida, Khameleon Software creates technology solutions that help office furniture dealers run more productive, profitable and interconnected businesses. From managing orders and generating reports to costing, billing, project management and CRM, Khameleon empowers office furniture dealers to run their business on one single, scalable platform. Many of the most well run office furniture dealers in the industry choose Khameleon for their day-to-day business operations, making us one of the industry's leading technology solution providers for 17 years and running.
