May 10, 2017

CTL (Changing The Lifestyle) is a company dedicated in designing for healthy lifestyle. It is located in Seoul, South Korea, one of the global hubs for innovative design and world class engineering. CTL focuses on the space and time that form people's life to find the little things that help individual to improve their body and mind, and live a healthier, happier and more fulfilled life. CTL's first office ergonomic product Officiser will make debut at the NeoCon, 12-14 June 2017.

Officiser is designed for office workers to redefine sitting, significantly and efficiently increasing daily activity level at work without breaking a sweat. It is an innovative gadget that incorporated the health and productivity benefits of an under-desk exerciser and an ergonomic footrest. Prolonged inactivity from long hours sitting in the

office is a major health risk for office workers worldwide. And it also cost companies USD 67.5 billion in health bills and productivity loss.

The product is designed in collaboration with SAIDII, iF Award and REDDOT Design Award winner. And the sleek and compact design make it easily fit under the office desks. And with ivory color and matte finish, Officiser can mix into most office environment perfectly.

Officiser is a ground breaking active furniture that let office workers 'sit and walk' at the same time with little distraction. Officising for 8 hours at work may equal to walking for 18 miles in terms of extra calorie burns! Besides, scientists have proven that light activity can actually improve cognitive ability, lower stress level and increase productivity. It is also the world's first fitness device that implemented ankle rolling function, which not only makes Officiser more fun to use but also have significant health benefits for its users. Studies have shown that while officising, office workers can work not only the diverse muscle groups and strengthen their joints of lower limbs, but also relieve stress in their legs and lower back. In addition, thermocam test has shown that Officising can boost blood circulation, helping people to prevent cardiovascular diseases and discomforts like feet and leg swellings. Officiser can also be turned into a perfect ergonomic footrest with one simple step that improves the overall sitting posture.
