FOR IMMEDIATE RELEASE

Chief Brings New Twist to Digital Architecture

Freestyle Rotation Accessory Supports Abstract Video Wall Design

Eden Prairie, Minn., USA (MAY 2017) - www.milestone.com - Chief, an industry leader in AV mounting solutions, has opened new, creative video wall possibilities with the Freestyle Rotation Adapter that works with Fusion and ConnexSys mounts. The solution will be on display at Chief's NeoCon booth 7-4133.

"It's all about creativity," said Tony Caruso, Product Manager. "Chief allows you to create the eye-catching AV experience you want with the ability to rotate the display to any angle. The FRA works with Fusion and ConnexSys, allowing designers to add the features they need to create the results they want."

The FRA enables infinite orientation possibilities with 90 degrees of rotation that can be set in multiple positions. Positive lockouts are at 15 degree increments. The accessory is compatible with Fusion wall, ceiling and freestanding mounts. When combined with the new Fusion Depth Accessory, FCADA, certain Fusion mounts can be set at different depth levels for overlapping possibilities.

For video wall applications, use FRA with the ConnexSys Video Wall Mounting System, which provides fine adjustment features and allows for a range of sizes and brands to stay flush with each other.

- Weight capacity when used with ConnexSys is 125 lbs (56.7 kg) per display
- Weight capacity with Fusion single stud mounts is 55 lbs (25 kg) per display

Additional compatibility information can be found at milestone.com/freestyle.

The FRA and FCADA accessories are both available to order now.

About Chief

[Chief](http://www.milestone.com), a brand of [Milestone AV Technologies](http://www.milestone.com), has more than 35 years of proven product and service excellence. Committed to responding to industry needs, Chief offers a complete line of mounts, racks, power and storage accessories for TVs, displays, projectors and other AV components.
