## **Unika Vaev's Acoustical Product Intro's at NeoCon World's Trade Fair 2018**

**CHICAGO, IL June, 2018 – Unika Vaev builds upon its portfolio of decorative acoustical solutions with the following products.**

### **SpeakSpace™ Collection**

SpeakSpace™ is a collection of freestanding privacy pods and meeting rooms for today's collaborative office. This product dampens outside noise and sound originating from within the meeting space. Its design targets mid to high range sound frequencies.

Available with standard features like lights, vents, USB ports and pre-wired for 110v electrical needs, this product represents a beautiful and simple solution to today's varied office interiors.

Noise can be both audible and visual, SpeakSpace™ solves both. Our product doesn't feel closed in. Our products quietly fit into the environment by using materials that speak a common language with the finishes in the space.

SpeakSpace™ Meet addresses the importance of honoring the specifier's space planning intent. Designed as a solution to the growing need for free standing independent meeting areas, SpeakSpace™ Meet, quietly fits into the environment by using materials that speak a common language with the finishes in the space.

Available in multiple sizes beginning with 8'X8', SpeakSpace™ Meet dampens outside noise and sound originating from within the room. Its design targets mid to high range sound frequencies. Noise can be both audible and visual, SpeakSpace™ Meet solves both.

### **ecoustic® Sculpt Collection**

The ecoustic™ Sculpt Collection of ceiling tiles have been designed to provide a wide variety of drop-in ceiling tiles available in 9 profiles from Instyle's ecoustic™ SC (solid color) PET panels. The ecoustic™ SC PET panels achieve a 0.80 NRC rating with a 200 mm air gap and achieve a class A flame spread rating. The ecoustic™ Sculpt Collection provides a simple and quick installation ceiling tile product for use with suspended ceiling grids of both 9/16<sup>th</sup> and 15/16<sup>th</sup> grid sizes, in 4 ft. x 2 ft., and 2 ft. x 2 ft. format.

### **ecoustic® Torque Collection**

ecoustic™ Torque is a functional, low-level reverberant acoustic tile available as a wall tile (24" x 24") and ceiling tile, ideal for new and existing 24" x 24" and 48" x 24" suspended ceiling grid systems. The chevron design is inspired by architectural fretwork of the art-deco period. Subtle and directional patterns can be created by altering the color and orientation of the tiles to create formations that articulate light and shadow.

Ecoustic Torque Ceiling Tile is a functional, low-level reverberant acoustic tile available as a wall tile (600 x 600mm) and ceiling tile, ideal for new and existing 600 x 600mm and 1200 x 600mm suspended ceiling grid systems. The chevron design is inspired by architectural fretwork of the art-deco period. Subtle and directional patterns can be created by altering the color and orientation of the tiles to create formations that articulate light and shadow.

### **Bryndis Collection**

A love of texture and sculptural forms led Icelandic artist and designer Bryndis Bolladóttir to develop Kula and Lina, a range of colorful spherical, hemispherical, and cylindrical products made of Icelandic felted wool.

The collection is produced from Icelandic Wool, layered over mineral wool and flexible polyurethane foam. The design and production of this product results in maximum sound absorption with minimal coverage requirements.

### **Unika Vaev Baffle Collection**

SkyBridge Baffle - The SkyBridge™ baffle system combines elegant modern lines with superior acoustical performance. Multiple configurations provide the designer many ways to accommodate challenging spaces. The system is well priced. Simple installation further enhances its cost effectiveness.

Cosmos Baffle - Originally designed as a "concept" installation to explore the more organic elements of design, and make a dramatic visual statement, the Cosmos Baffle design lives within the space, allowing light and air to pass through while creating increased acoustic performance. Available as a kit of 9 fins, or can be custom cut to fit your needs, Cosmos is easy to install using the Unika Vaev Grid system and available in either 22 colorways of ecoustic felt or 6 colorways of solid color core material.

Boomeraang Baffle - Boomerang explores the use of creative design techniques to create beautiful curves using Unika Vaev's Solid Color Core acoustic panels. Designed to be flexed to meet the needs of individual space design, Boomerang provides a creative way to solve acoustic issues within a wide range of spaces.

**These designs can be viewed in the ICF Group's Showroom on the 3<sup>rd</sup> floor, showroom 365, at the NeoCon Show!**
