

LEED for Interior Designers

Green Education Services

NEOCON 2011

Speaker: Michelle Cottrell

Outline:

- Sustainability and design: the benefits, the costs
 - Understanding the Triple Bottom Line
 - Integrated Project Delivery
- LEED Basics
 - USGBC versus GBCI
 - Accreditation versus Certification
 - LEED Rating Systems
 - MPRs and Boundaries
 - Prerequisites versus Credits
 - Certification: Paths, Fees and Levels
- The Strategies of LEED
 - Sustainable Sites (SS)
 - How to Develop versus Where to Develop
 - SS for Interior Designers
 - SS Credit 1: Site Selection
 - SS Credit 3.2: Alternative Transportation
 - Water Efficiency (WE)
 - Energy & Atmosphere (EA)
 - Reduce Consumption/Increase Efficiency
 - EA for Interior Designers
 - EA Prerequisite 2 and Credit 1: Energy Performance
 - EA Credit 3: Measurement & Verification
 - Commissioning
 - Manage Refrigerants
 - Renewable Sources
 - Materials and Resources (MR)
 - MR for Interior Designers
 - MR Credit 1.1: Tenant Space – Long-Term Commitment
 - MR Credit 1.2: Building Reuse & Credit 3 Materials Reuse
 - MR Credit 2: Construction Waste Management
 - Life-Cycle Impacts
 - Indoor Environmental Quality (EQ)
 - IAQ strategies for Interior Designers
 - Specifications for Construction Compliance
 - IAQ Management
 - Low-Emitting Materials
 - Thermal Comfort
 - Lighting
 - Innovation and Design
 - Regional Priority
- Keys to Success

Triple Bottom Line

Will it promote a more efficient environment?

ECONOMIC
PROSPERITY

ENVIRONMENTAL
STEWARDSHIP

SOCIAL
RESPONSIBILITY

Does it have a negative impact on the environment?

Does it promote the well being of the building's employees, occupants, and stakeholders?

Keys to Success?

- Start the process EARLY!
- Define Triple Bottom Line goals
- Define Roles and Responsibilities for team members in contracts and specs
- Track Progress
- Close the gap between design and construction phases
- Go for the split-review
