NeoCon 2011 Presentation By LDA

POSTED BY JEREMY WINDLE

INCORPORATING LEDS WITHOUT GETTING BURNED

NeoCon 2011 at The Merchandise Mart, Chicago from June 13 - 15

Get a crash course on LED products and arm yourself with knowledge. As LED technology changes from week to week, you'll be able to ask reps and manufacturers the right questions to keep yourself up to speed. Discuss lighting issues including binning, heat syncs, color temperature, color shift, controls, testing, and sustainability. Get a basic understanding of the components of a LED system including control options, and then learn to recognize opportunities for LED lighting in your own projects. Also, make sure you know how to discern when LED lighting is right and when other traditional lighting is appropriate for your architectural or sustainable goals.

Incorporating LEDs Without Getting Burned [W308]
