Spacesaver Introduces New Products at NeoCon 2011

Visit the Spacesaver showroom in space 11-117 at Chicago's Merchandise Mart during NeoCon 2011, June 12th-15th, and learn to fill gaps in time management, space allocation, and security with Spacesaver's most recent product introductions.

Spacesaver is featuring recently launched [ControlLOC™ Technology](#). With ControlLOC Technology from Spacesaver, authorized personnel can track and document who accessed a storage system, which cabinets they entered, and the date and time of every interaction. ControlLOC is the ideal storage solution to prevent unauthorized access to narcotics and other high value drugs prior to patient delivery in outpatient hospital pharmacies, or to ensure that the chain of custody is maintained for evidence handling in a public safety environment.

Visit the Spacesaver showroom in space 11-117 at Chicago's Merchandise Mart during NeoCon 2011, June 12th-15th, and learn to fill gaps in time management, space allocation, and security with Spacesaver's most recent product introductions.

Spacesaver is featuring recently launched [ControlLOC™ Technology](#). With ControlLOC Technology from Spacesaver, authorized personnel can track and document who accessed a storage system, which cabinets they entered, and the date and time of every interaction. ControlLOC is the ideal storage solution to prevent unauthorized access to narcotics and other high value drugs prior to patient delivery in outpatient hospital pharmacies, or to ensure that the chain of custody is maintained for evidence handling in a public safety environment.

"In addition to providing secure storage for narcotics and high value drugs in a pharmacy, ControlLOC Technology also improves efficiencies for both the personnel and patients using the pharmacy. When Spacesaver security lockers with ControlLOC Technology are positioned close to the patient drug pick-up counter and loaded daily with meds from the pharmacy vault, they reduce the running back and forth from vault to patient pick-up counter. Pharmacies can now serve more patients," said Miissa Rick, Director of Marketing at Spacesaver. "This is just one of several secure storage applications that we are targeting for ControlLOC."

Another popular application for this technology resides in short-term evidence storage. Spacesaver has taken the industry-leading DSM evidence lockers and enhanced its keyless deposit systems with an audit control access system that allows property room managers and evidence technicians the ability to document which officers and evidence technicians accessed the system, which evidence lockers they entered, and the date and time of every transaction.

Spacesaver will also be showcasing their newest component for the Wheelhouse™ Mobile Storage System: the [XpressDEK™ Rail System](#). True modularity, durability and low-install impact in cost and site disturbance make the new XpressDEK Rail System the ideal option for the Wheelhouse Mobile Storage System. The XpressDEK modular floor adds flexibility and it creates opportunities for your ever-changing storage requirements.

To learn about these and more space-saving solutions from Spacesaver visit with one of our storage specialists in our showroom at NeoCon. "Gaps in storage security, flexibility and usability can prevent spaces from functioning to their full potential," says Julie Weber, A&D and Environmental Marketing Specialist with Spacesaver. "Spacesaver storage systems are uniquely tailored around the needs of the user. We are excited to showcase some of our most recent innovations at this year's NeoCon."

To keep up with Spacesaver while at NeoCon follow us on Twitter at <http://www.twitter.com/Spacesaver> or on Facebook at: <http://www.facebook.com/pages/Spacesaver/305367237390>.

About Spacesaver

Time is money, space is limited, security is paramount and storage solutions affect all three. Storage decisions aren't value neutral – they can move you forward, or hold you back. Spacesaver® Corporation (Fort Atkinson, Wis.) is the innovator in storage – from high-density mobile storage, to secure storage for military applications, government and public safety, to new ideas that can streamline education, business, industrial and healthcare operations. Spacesaver Corporation has over 275,000 storage installations worldwide. Visit <http://www.spacesaver.com> to learn more about Spacesaver products and solutions.

About KI

Spacesaver Corporation is a division of KI (Green Bay, Wis.). KI manufactures innovative furniture and movable wall system solutions for education, healthcare, government and corporate markets. KI tailors products and service solutions to the specific needs of each customer through its unique design and manufacturing philosophy.
