

PREVIEW: NEOCON 2010

Now in its 42nd year, the NeoCon World's Trade Fair (June 14-16 at the Chicago Merchandise Mart) will feature two new programs reflecting today's market realities in the contract-furnishings field. One addition is a series of career-development seminars designed to assist industry professionals who are looking for a job or trying to secure their current position. And reflecting the ongoing interest in eco-friendly buildings, Buildex Chicago will showcase products and strategies designed to help manage and operate buildings more efficiently.

Other programming highlights include a keynote address by Michael Graves and off-site visits to such locales as the new theWit Hotel and a green building walking tour. For more information, visit www.neocon.com. — MH
