MAYER FABRICS BRINGS AUTHENTIC INNOVATION TO THE TEXTILE INDUSTRY WITH THE QUANTUM COLLECTION

Chicago, IL — NeoCon is a time for the commercial design industry to introduce their most innovative and newest products. Mayer Fabrics' *Quantum Collection* launched at NeoCon 2019 evokes the essence that is the show's existence – innovation and forward thinking.

Mayer Fabrics is pleased to introduce the *Quantum Collection*, featuring new high-performance textiles Gravity, Relativity, Molecule and Vector. Exclusively shown at showroom 1173.

Patterns "Gravity" and "Relativity" represent a new and innovative product category of commercial textiles in which a woven textile is chemically bonded with the durable components of a coated fabric. The technology, trademarked as "Tekloom," is new to the market and uses TPE (Thermo Plastic Elastomer) to create a "fused" or "hybrid" textile for commercial upholstery. The result is an aesthetically beautiful textural quality with the extreme-performance attributes of a coated material.

- Fabrics are ink and stain resistant
- Impermeable to liquids
- Bleach cleanable
- Exceed 1 million double rubs
- Comply with REACH and California 01350 VOC Standard
- Healthier Hospitals Initiative and Kaiser Permanente compliant

"Gravity" and "Relativity" are the first Tekloom TPE fabrics to be introduced in the commercial textile and furnishings market.

Also debuting at Mayer Fabrics are several new textile collections:

- Majorelle Collection
- Tourist Collection
- Good Vibes Collection
- Velvets Collection
- Coated Fabrics Collection
- Hemisphere Collection

A colorful matrix of 10 columns and 5 rows is a focal point in showroom 1173. The gradient of textures and colors holds the attention of its audience. The 50 patterns that construct the matrix are all budget-conscious design solutions for the specifier seeking both style and value.

Mayer Fabrics partnered with furniture supplier Thayer Coggin, Inc. from High Point, NC to provide most of the showroom furniture. To Learn more about Thayer Coggin visit, thayercoggin.com.

THAYER COGGIN DEBUTS TC SPACES, A NEW CONTRACT DIVISION, AT NEOCON 2019

(Chicago, IL) In recognition of the growing preference for inviting, inspiring and comfortable spaces for collaborative work environments, Thayer Coggin proudly presents TC Spaces, a new contract division of the esteemed maker of classic modern furniture.

TC Spaces will unveil portions of its initial product line at NeoCon 2019 (June 10-12) in Space #1173 of the Chicago-Merchandise Mart.

TC Spaces features a collection of designs by Milo Baughman, Ransom Culler and Guy Hill that will provide exciting new options for the classic modern and midcentury modern commercial space.

Backed by Thayer Coggin's highly-respected history of superior craftsmanship, TC Spaces furniture is bench-made with the highest quality raw materials and exacting engineering standards necessary for the demanding requirements of the contract market.

TC Spaces furniture is produced in Thayer Coggin's historic High Point, North Carolina workshops, where some of the most iconic furniture designs of the midcentury modern era were created and are still being handmade by a collection of talented, local craftspeople.

Over a period of 50 years, Thayer Coggin and Milo Baughman collaborated on designs, engineering and manufacturing techniques that served to define the midcentury modern era of American residential furniture.

Milo Baughman (1923-2003), was one of the leading furniture designers of the second half of the 20th century. Baughman's uniquely American designs are forward-thinking and distinctive, yet unpretentious. Baughman famously quipped, "Furniture that is too obviously designed is very interesting, but too often belongs only in museums."

Baughman's influential work was included in "High Styles: Twentieth Century American Design" at the Whitney Museum of American Art. In 1987, he was inducted in the Furniture Hall of Fame. Thayer Coggin (1922-2003) was inducted in the Furniture Hall of Fame in 2004.
