

**OASIS BERCO UNITS GAIN ETL/INTERTEK LISTING IN TIME FOR NEOCON 2019
PRODUCTS COMPLY WITH UL STD 962**

April 18, 2019

All Oasis Berco Phone Booths, Meeting Pods, Hubs, and Acoustic Booths are now ETL/Intertek Listed, demonstrating compliance to UL STD 962 and CSA STD C22.2 #9.0.

This certification has been earned through rigorous independent testing and follow up inspections by an NRTL (Nationally Recognized Testing Laboratory). These tests and inspections are identical to those done by competing certification marks (UL, CSA, and others). The ETL Intertek lab is accredited by the same organizations, agencies, and regulatory bodies as UL.

Inspectors, code officials, and Authorities Having Jurisdiction all recognize the ETL Mark as proof of product compliance throughout North America.

With this certification, Oasis Berco becomes the first manufacturer in the office phone booth and meeting pod category to have its products recognized and listed across its entire product range.

ETL (Electrical Testing Labs) was founded by Thomas Alva Edison in 1896 and has a long history of providing assurance to consumers through product performance and safety testing.

Oasis Berco is a joint venture between Frem Group (UK) and Berco Designs (US). The company manufactures and sells office phone booths, meeting pods, acoustic pods and hubs to provide privacy in open plan office spaces. All Oasis products are made in the USA.
