

Exhibiting at NeoCon 2019: Berco Designs Announces Joint Venture With Frem Group To Manufacture And Distribute Innovative Office Acoustic Privacy Solutions

April 10, 2019

The new partnership of Oasis Berco, LLC will officially introduce Oasis Collection of Phone Booths, Pods, and Hubs into the North American market during NeoCon 2019.

The Oasis Collection, created by Frem Group, has been successfully installed in many of Europe's leading corporations, and includes a wide range of pods, hubs, booths, and social spaces designed to allow for collaboration, one-to-one meetings, or quiet spaces. The Collection is comprised of two ranges: Oasis Linear, with straight line features to match general office partitioning, and Oasis Soft, with its unique "soft" features providing a more domestic feel.

The interest in noise reduction and privacy in work spaces is growing rapidly in the US market as more and more companies are adopting open plan offices. Frem Group has been successfully selling into the US market in limited distribution for the past two years and Oasis Berco will now allow the brand to meet marketplace demand and establish coast-to-coast distribution.

Frem Group is based in the UK and has been designing and manufacturing exceptional furniture products for over 25 years. Frem's broad line of commercial furniture products can be found across Europe, North America, and the Middle East.

Founded in 1968 and acquired by Fairway Holdings, Inc. in 2013, Berco Designs provides a wide range of products to the contract furniture industry including tables, collaborative seating, and millwork. All of its products, including all Oasis Berco units, are proudly made in the USA at its 150,000 square foot facility in St. Louis, MO.

The companies will launch their joint venture at NeoCon in Booth Space 9074 in the Market Suites on Seven at the Merchandise Mart.
