## **Edelman Leather Hospitality Collection: Fast, Affordable Luxury Solutions**

Hospitality lives at Edelman with budget-conscious, quick-turnaround options that don't sacrifice beauty, durability, or choice. The expanded collection features three new types of leathers and a renewed focus on the hospitality market's need for quality, performance, fast delivery, and value.

You will still find Edelman Leather's artistry, history, reliability, and devotion to quality, which are at the core of the trust we've built within the design community. Based on decades-long relationships with our tanneries, and an unwavering commitment to exceptionally-crafted leather, we deliver consistent, reliable products for our clients.

Uncompromising quality translates to value. The leather is carefully-sourced in Europe which allows for hide consistency and higher yield per hide. Simply put, you get more leather for your money. With quality and value come access to our unsurpassed custom capabilities.

High-traffic performance paired with beauty is built-in. These durable, heavy-duty leathers come standard with protective finishes and our exclusive EDGE Stain Release. The leathers comply with all applicable flammability tests, surpass any Wyzenbeek double rub standard, and are GREENGUARD Indoor Air Quality Certified. In addition, our tanneries are ISO Certified.

Delivery is fast and reliable. We team with clients to meet their timelines. Edelman's domestic capabilities and overseas relationships allow quick turn-around deliveries for deadline-driven realities. Large quantity custom orders are delivered in as little as four weeks. With our local finishing plant, we custom color smaller quantities in under four weeks. Since we have our own Edelman inspection teams at our tanneries, we can direct drop ship outside of the US.

Three new trustworthy and inviting leathers include: Rambler, with a strong, large grain; Voyager, with a soft, small grain; and Wanderer, which has a hint of shine and tight grain. Rounding out the hospitality collection, we have over 230 textures and styles, all suited for high-traffic, high volume, and high-visibility realities.

Hospitality lives at Edelman Leather.
