

TIS THE ITALIAN SPACE
Workplace Revolution for the very first time at Neocon 2019
June 10-12, 2018

(New York, NY - May 2019) For the very first time The Italian Space will display its exclusive products at one of the most important international Exhibition such as Neocon Chicago 2019.

The Italian Space, leading Company in the workplace sector, with over 1 million sqm produced, 50.000 offices realized in more than 100 buildings spread in 30 countries, in less than 4 years, has revolutionized the office sector.

Providing architectural solutions since 1985 for major international companies, it is specialized in the design and production of contemporary office partition walls and workplace systems.

Its main customers are international contract companies, real estate developers and shared-office companies.

The Italian Space, also known as TIS, grant architects and designers a “white paper” to express their creativity, thanks to the flexibility of its products and its tailor made solutions.

The company’s success is a fine combination of design, technology and service with very high production volumes developed in a short time.

With Headquarter in New York, the R&D and production is 100% Made in Italy. Our target is to be the number one cutting-edge company for the best “well-being” in the workplace for the widest customer satisfaction.

At Neocon Chicago 2019 will be exhibited 2 out of 4 lines of products: Michelangelo and Galileo.

tis

WORKPLACE REVOLUTION

Michelangelo is the highest class line, the most design-oriented and so iconic in its style. A complete line starting from 3 clear stratified safety glazed panels with incorporated LED lighting.

Galileo is considered an all round system for any kind of application in executive and management offices. It has complete modularity thanks to a clever project that couples simultaneously partitions with three or two glazed panels.

Above the 4 lines of products, it carry out all kinds of special projects, fulfilling the one-off requests from architects and interior designers to fit in with the new evolutionary trends in the workplace.

The entire products and processes of TIS focus on the reduction of the environmental impact, such as the use of recyclable materials for metal, glass, wooden parts and packing. An easy separation of each material at the end of the products life cycle is an added value.

The whole range of TIS wall systems bears the CE mark pursuant to the Directive 89/106/CE.

Last but not least, quality is the key element of TIS people's everyday behaviour.
A work for a brighter future for the Company itself and the entire world is constantly carried out.
